ANNOUNCEMENT

EISA Award Marantz SA8003

Award citation of the EISA jury:

SA8003: Best Product Audio Source 2009-2010

Modern audio players face many challenges and Marantz's SA8003 meets them all. It plays CDs and the stereo tracks of SACDs. It handles MP3, AAC or WMA files via an advanced USB port, which can even control an iPod directly. Based on the successful SA7003, the SA8003 benefits from the work of Marantz's 'tuning wizard' Ken Ishiwata, who pushed the quality up to audiophile standards. This has been achieved through various technical and mechanical upgrades, including the use of Marantz's trademark copper-plated chassis. You will find lots of other familiar Marantz ingredients in this player, such as powerful HDAM output stages and a low-noise disc drive. So it's no wonder that the hugely versatile SA8003, available in champagne or black, is top among the players in its class.

About EISA:

EISA stands for the European Imaging and Sound Association. The European Eisa Awards are chosen annually by panels representing nearly 50 prominent Photo, Video, Audio, Home Theater, In-Car and Mobile Device independent magazines from over 19 European countries. Over the years EISA award has remained the premier consumer electronics award in Europe.
